

Three bodies. Forty-nine twists.

$$\frac{d^2 \mathbf{r}_i}{dt^2} = \sum_{j \neq i} \frac{\mathbf{r}_j - \mathbf{r}_i}{|\mathbf{r}_j - \mathbf{r}_i|^3}, \quad G = m_1 = m_2 = m_3 = 1$$

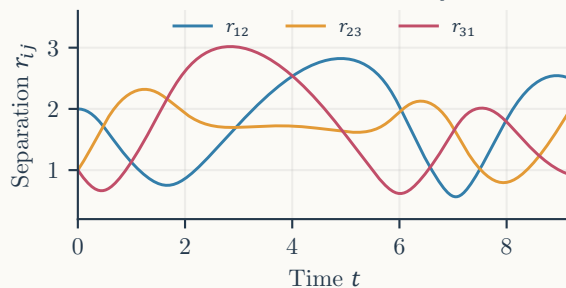

A HS.273 / one complete period

B Inside the weave

C A first look at the rhythm

$T = 451.649675$ / Local float64 integration, no forced closure
 Position closure: $9.3e-07$ / max relative energy drift: $1.5e-09$
 HS.273 / Hristov, Hristova & Tanikawa (2026) / orbit source
